

Dr. Rajnish Kumar, Ph.D., Assistant Professor

Date: 07.08.2022

To Whom It May Concern

This is to certify that Mayank Ghogale worked as a research intern under my guidance from June 22nd, 2022 to August 5th, 2022.

During this period, he worked on Artificial Intelligence aided Drug Discovery using libraries like GraphInvent and DockStream.

As his internship supervisor, I found that Mayank was motivated to work, and eager to learn about the underlying mathematics of the model, as well as the biological aspects of the application. I also found that Mayank has a profound knowledge of python and is always eager to work on the next task.

I wish him all the best for his future endeavours.

With Regards,

Dr. Rajnish Kumar
